

SAVE YOURSELF OR A LOVED ONE FROM DYING FROM STROKE

DON'T IGNORE
THE WARNING
SIGNS OF STROKE
– IT COULD SAVE
YOUR LIFE

- Even if symptoms go away, they may be what is known as a TIA (transient ischemic attack) or “warning stroke,” which means they can be a warning sign that a bigger, more severe stroke is on the way.
- **SEEK IMMEDIATE MEDICAL ATTENTION** for ANY signs of stroke, **EVEN IF YOU FEEL BETTER**. This may save your life! The faster a stroke is treated, the greater the chance of survival and recovery.
- **COMMON SIGNS OF STROKE INCLUDE:**
 - **SLURRED SPEECH** OR INABILITY TO SPEAK
 - **WEAKNESS** IN ONE ARM AND/OR LEG
 - **FACIAL DROOP** – UNEVEN SMILE
- **LESS COMMON SIGNS OF STROKE:**
 - **SUDDEN CONFUSION**
 - **SUDDEN NUMBNESS** OR WEAKNESS
 - **SUDDEN CHANGE IN BALANCE, TROUBLE WALKING, OR DIZZINESS**
 - **TROUBLE SEEING** IN ONE OR BOTH EYES
 - **SUDDEN SEVERE HEADACHE** WITHOUT A KNOWN CAUSE
- **CALL 911** OR SEE YOUR DOCTOR IMMEDIATELY, even if you are not sure! It could save your life.
