In the **last 30 days**, lack of transportation has **prevented the patient from:**
{Transport-Related Activities:42818}

- N/a (**default**)
- Attending a medical appointment
- Picking up a prescription
- Getting requested lab work
- Getting requested imaging
- Grocery shopping
- Purchasing clothing
- Attending a social function

If barrier(s) reported above, has the **medical home nurse been notified?** {YES:19151::"Yes"}

After-Visit Summary .Phrase

If you are having difficulty finding a ride to your next medical appointment, you are not alone.

Not having reliable access to a car can make it very hard to go to your doctor appointments, pickup medications, get blood work, buy groceries and more. These activities are very important for making sure you stay healthy and preventing any complications from medical conditions.

There are **more transportation options available in Clinton County than just taxis and busses. We can connect you with resources** to get you a ride to your next appointment. Also, your doctor can work to make sure that appointments, lab work, and imaging is grouped together to keep the number of times you need to find a ride to as few as possible.

Your doctor will refer you to our specialty nurses that work at the Family Medicine Center. Our medical home nurses will work with you to help you find consistent options to get a ride. This can include finding which programs fit your needs, signing you up for services, and when available, giving out temporary fixes like bus vouchers.

Some of the programs available locally include some of the following listed below. This is not a complete list, the medical home nurse will help identify all the resources available to you and help you get what you need.
