TWENTY-FOURTH
Annual Announcement.

MEDICAL DEPARTMENT

University of Vermont.

For the Year 1877.
Board of Trustees.
1876.

MATTHEW HENRY BUCKHAM, A. M.,
President.

ASAHEL PECK, LL. D.,
Ex-Officis.
Governor of the State.

ON THE PART OF THE UNIVERSITY OF VERMONT.

Rev. HENRY PEARL HICKOK,
OLIVER PHELPS CHANDLER,
HENRY LOOMIS,
Rev. CLARK ELA FERRIN, A. M.,
Rev. CHARLES CARROLL PARKER, D. D.,
LAWRENCE BARNES,
ALBERT LEONARD CATLIN,
LEVERETT BRUSH ENGLESBY, A. M.
WORTHINGTON C. SMITH.

ON THE PART OF THE STATE AGRICULTURAL COLLEGE.

Rev. HORACE HERRICK,
JUSTIN SMITH MORRILL, LL. D.,
SAMUEL H. STEVENS,
1869—1875.

HORACE FAIRBANKS,
PAUL DILLINGHAM, A. M.,
HENRY CLARK, A. M.,
1871—1877.

GEORGE GRENVILLE BENEDICT, A. M.,
HENRY D. HOLTON, M. D.,
1873—1879.

GEORGE GREVNILE BNEDEICT, A. M. Secretary.

NATHAN STRONG HILL, A. M., Treasurer.
TWENTY-FOURTH

ANNUAL ANNOUNCEMENT

OF THE

MEDICAL DEPARTMENT

OF THE

University of Vermont

AND

State Agricultural College,

BURLINGTON, VT.,

FOR THE YEAR 1877.

BURLINGTON, VT.;

R. S. STYLES, STEAM BOOK AND JOB PRINTER.

1876.
FACULTY OF MEDICINE.

MATTHEW HENRY BUCKHAM, A. M., BURLINGTON, VT., President.

SAMUEL WHITE THAYER, M. D., BURLINGTON, VT., Emeritus Professor of General and Special Anatomy.

WALTER CARPENTER, M. D., BURLINGTON, VT., Professor of the Theory and Practice of Medicine.

JOHN ORDRONAUX, M. D., LL. D., NEW YORK CITY, Emeritus Professor of Medical Jurisprudence.

PETER COLLIER, Ph. D., M. D., BURLINGTON, VT., University Professor of Chemistry and Toxicology.

WILLIAM DARLING, A. M., M. D., F. R. C. S., NEW YORK CITY, Professor of General and Special Anatomy.

A. F. A. KING, M. D., WASHINGTON, D. C., Professor of Obstetrics and Diseases of Women.

HENRY D. HOLTON, M. D., BRATTLEBORO, VT., Professor of Materia Medica and General Pathology.

MARSHALL CALKINS, A. M., M. D., SPRINGFIELD, MASS., Professor of Physiology and Microscopic Anatomy.

JAMES L. LITTLE, M. D., NEW YORK CITY, Professor of the Principles and Practice of Surgery.

PROFESSORS ON SPECIAL SUBJECTS.

D. B. ST. JOHN ROOSA, A. M., M. D., NEW YORK CITY, Professor of Diseases of the Eye and Ear.

WILLIAM A. HAMMOND, M. D., NEW YORK CITY, Professor of Diseases of the Mind and Nervous System.

EDWARD S. PECK, A. M., M. D., Adjunct Professor of Diseases of the Eye and Ear.

ROBERT W. TAYLOR, M. D., NEW YORK CITY, Professor of Diseases of the Skin.

A. P. GRINNELL, M. D., BURLINGTON, VT., Professor of Diseases of the Heart and Lungs.

STEPHEN M. ROBERTS, M. D., NEW YORK CITY, Professor of Diseases of Children.

A. T. WOODWARD, M. D., BRANDON, VT., Professor of the Surgical Diseases of Women.

HENRY H. DEANE, M. D., BURLINGTON, VT., Assistant to the Chair of Physiology, Demonstrator of Anatomy and Curator of Museum.

H. H. ATWATER, M. D., BURLINGTON, VT., Instructor in Obstetrics and Diseases of Women.

GEORGE C. BRIGGS, M. D., BURLINGTON, VT., Instructor in Materia Medica.

LEROY B. BINGHAM, M. D., BURLINGTON, VT., CHARLES P. BURNS, M. D., BURLINGTON, VT., Assistants to the Chair of Surgery.

WM. C. REEVES, Jr., M. D., NEW YORK CITY, Assistant to the Chair of Diseases of the Mind and Nervous System.

A. P. GRINNELL, M. D., Dean.
The Faculty of the Medical Department of the University of Vermont, in issuing their Twenty-Fourth Circular and Catalogue, take pleasure in announcing the continued success and uninterrupted progress of the Institution under its present improved management.

The Medical College is situated near the University buildings, and upon an eminence overlooking the city of Burlington, Lake Champlain and the Adirondack chain of mountains. For beauty of scenery and salubrity of climate its situation is not surpassed by any Institution of learning in the country. The building is of brick, well ventilated, and provided with two commodious lecture-rooms and amphitheatre, two large, well-lighted dissecting-rooms, and in every way perfectly adapted for clinical and scholastic teaching. It contains a large museum, composed of a great number of Osteological and Vascular preparations, both wet and dry, and is open to the students during the session.

During the late vacation, the interior of the building has been completely renovated, the lecture-rooms painted, and the seats newly repaired; the Faculty having determined to spare no pains in contributing to the welfare and comfort of the students.

The plan of instruction adopted by this Institution, consists of a complete course of scholastic lectures by able Professors in the seven essential branches of Medical Science, viz: Anatomy, Physiology, Materia Medica, Chemistry, Surgery, Obstetrics and the Theory and Practice of Medicine.

In order to render the course of instruction as thorough as possible, the Faculty have selected a number of gentlemen to lecture upon special subjects. Such parts of the regular course as are not taught in detail by the regular Professors will thus receive special attention by gentlemen who are acknowledged authorities in their respective
specialties; each one giving a short and practical course of lectures. This plan, which was adopted for the first time at the last session, was highly appreciated by the students, since it enabled them to attain a more exact knowledge of important subjects than they could have received from the general lecture courses.

The Faculty take pleasure in again announcing the names of Professors D. B. St. John Roosa, Robert W. Taylor, A. P. Grinnell, and Stephen W. Roberts, who will lecture on their respective branches as during the last session.

The Faculty are able also to state, and with great satisfaction, that Prof. Wm. A. Hammond, the distinguished Neurologist, of New York, has been appointed Professor of Diseases of the Mind and Nervous System, and will deliver a course of lectures on this important branch of Medicine during the term—an addition to the special studies of last year, the value of which can hardly be overrated.

Dr. A. T. Woodward, of Brandon, Vt., has also been appointed Professor of the Surgical Diseases of Woman, and will lecture on this subject during the term.

The Faculty wish to call special attention to the fact that these lectures on special subjects are delivered during the regular session, and not in the preliminary term, as is the custom in many Colleges.

**General outline of the course of lectures.**

**Practice of Medicine.**

Prof. Walter Carpenter.

The course of instruction in this department will be thorough, and such as will enable the student to become acquainted with the pathology and treatment of special diseases, and supply him with the necessary knowledge to observe the phenomena of disease. The Lectures will be illustrated with morbid specimens and casts.

**Chemistry and Toxicology.**

Prof. Peter Collier.

The lectures in this department relate to the fundamental doctrines of chemistry, or chemical philosophy, to inorganic substances, and to the chemistry of the vegetable and animal kingdoms. Toxicology,
or the science of Poisons, a subject of the greatest importance to the practitioner, both in its pathological and medico-legal relations, receives special consideration. In connection with this course a chemical laboratory is established, in which students who desire it are instructed in analytical chemistry, and particularly in the examination of the various organs, secretions and excretions of the human body. Students are taught the more simple and accurate methods of making analyses of the blood, milk, urine, etc., with particular reference to their duties as medical practitioners.

**General, Descriptive and Surgical Anatomy.**

**PROF. WILLIAM DARLING.**

As a teacher in this department, Prof. Darling has no superior, as those who have listened to his lectures in both the Universities of Vermont and New York can testify. He is the only person in this country who is a fellow of the Royal College of Surgeons, England, by examination. His lectures will be illustrated by demonstrations upon the cadaver, as well as by plates and diagrams. For the acquisition, therefore, of a thorough and practical knowledge of Anatomy, this Institution offers the student superior advantages.

**Obstetrics and Diseases of Women.**

**PROF. A. F. A. KING.**

Prof. King holds the same chair in the Columbian University, at Washington, D. C., and is one of the attending Physicians to Providence Hospital in that city.

This course will comprise a series of lectures on the Science and Practice of Midwifery, together with additional lectures on Gynecology. The lectures on Obstetrics will be illustrated by an elaborate collection of life-sized diagrams, together with natural preparations and *papier maché* models, exhibiting the anatomy and physiology of reproduction in all its stages. The mechanism and practical management of natural and preter-natural labors will be demonstrated on appropriate manikins, and obstetrical instruments of all kinds will be exhibited and their uses fully explained.

The department of Gynecology, which has of late obtained so great a prominence in medical practice, will be thoroughly taught, both as regards theory and practice, and all instrumental and other appliances required in treating the Diseases of Females will be presented. A complete assortment of instruments and a new collection of colored diagrams will form an attractive feature in this department.
MEDICAL DEPARTMENT OF

Materia Medica and General Pathology.
PROF. HENRY D. HOLTON.

In this department, especial attention will be paid to the physiological effects, and the therapeutical adaptation of remedies, with particular reference to their practical application, amply illustrated by experiments on living animals. Pathological specimens, both wet and dry, will also be used in illustration of different pathological conditions.

Physiology and Microscopic Anatomy.
PROF. M. CALKINS.

The lectures in this department will be illustrated, as far as possible, by experiments on animals, the use of the stereoptican, and microscopes, in order to exhibit to the student their more important facts and principles; more especially will the general functions of human physiology receive attention, and the relations of normal and abnormal life be described. Histological illustrations will be ample, as several excellent microscopes will be furnished for the more full elucidation of this branch of study.

Principles and Practice of Surgery.
PROF. JAMES L. LITTLE.

The lectures on the Principles and Practice of Surgery will be both scholastic and clinical. They will be given by Prof. Little, who for many years has held the position of lecturer on Operative Surgery and Surgical Dressings, in the College of Physicians and Surgeons of New York, and who is one of the Surgeons to St. Luke's and St. Vincent's Hospitals in that city.

All the important surgical operations will be performed on the dead body, and the use of surgical instruments and appliances will be demonstrated to the class. These lectures will be illustrated by a fine collection of plates, diagrams, and models. A Clinique will be held every Saturday, during the surgical course, when every facility will be afforded the class for witnessing all necessary surgical operations.

LECTURES ON SPECIAL SUBJECTS.

The Faculty being desirous of extending to the students every facility for the study of special departments of medicine, have established the following special courses, which will be extended hereafter, and it is believed, that with this addition to the regular curriculum, the advantages thus afforded by this College are unsurpassed by any medical institution outside of our large cities.
DISEASES OF THE EYE AND EAR.

Dr. D. B. St. John Roosa, Professor of Diseases of the Eye and Ear, in the University of New York, and author of the work on diseases of the Ear, which bears his name, has kindly consented to fill this chair, until Dr. Peck's return from Europe. He will deliver a course of lectures, thoroughly illustrated, and hold several clinics during his course, so that the student will be able to witness many of the important operations in this department.

DISEASES OF THE SKIN.

Prof. Robt. W. Taylor, one of the physicians to Charity Hospital, N. York, whose labors in this department of medicine are well known to the Profession, will deliver a course of lectures on this subject, illustrated by plates, diagrams, and microscopic specimens. He will also hold several clinics; thus, giving the students an opportunity of becoming familiar with the latest views on the subject of dermatology.

DISEASES OF CHILDREN.

Prof. Stephen M. Roberts will deliver a course of lectures on Diseases of Infancy and Childhood, a department of study generally either completely ignored, or but very superficially treated, although of the utmost importance to the practising physician.

DISEASES OF THE HEART AND LUNGS.

Prof. A. P. Grinnell will give instruction in this department. A knowledge of auscultation and percussion, and of cardiac and pulmonary affections, constituting one of the most necessary elements in the acquirements of the practitioner, will be taught in the most practical manner, so as to render the student every facility for becoming expert in the diagnosis of thoracic diseases.

DISEASES OF THE MIND AND NERVOUS SYSTEM.

The course of Lectures on Diseases of the Mind and Nervous System will be delivered by Dr. Wm. A. Hammond, who occupies a like chair in the University of the City of New York. The lectures will be both clinical and didactic, and will have special reference to the improved methods of research and treatment established by the most recent investigations. Electricity, in its relations to the nervous system, both in health and disease, will be the subject of particular attention.
SURGICAL DISEASES OF WOMEN.

Dr. A. T. Woodward, of Brandon, Vermont, will give, during the first part of the session, a course of lectures on the Surgical Diseases of Women. The lectures will embrace subjects to which Dr. Woodward has for many years given special attention.

---

CLINIQUES.

The following Cliniques will be held within the College building during the regular term. Patients presenting themselves at these Cliniques, for advice and treatment, are examined, and the peculiarities of each case explained, the appropriate treatment prescribed, and the requisite surgical operations performed before the class.

A Surgical Clinique will be held by Prof. Little every Saturday morning, from 9 to 12 o'clock, during the last half of the session. A large number of surgical operations are performed at these cliniques.

A Medical Clinique will be held by Prof. Carpenter on Wednesday morning, during the first half of the term.

A Clinique for Diseases of the Eye and Ear, by Prof. Roosa, will be held once a week during his course of Lectures.

A Clinique for Diseases of the Skin, by Prof. Taylor, will be held once a week during Prof. Taylor's course of Lectures.

A Clinique for Diseases of Children will be held by Prof. Roberts. Due notice of the time of holding the above Cliniques will be given.

A Clinique for Diseases of the Nervous System will be held during Prof. Hammond's course of lectures.

---

VETERINARY MEDICINE.

Prof. Noah Clessey, late of Massachusetts Agricultural College, has been engaged to deliver a course of lectures on Veterinary Medicine before the students of the Agricultural Department of the University. Students of the Medical Department can attend these lectures on the payment of a fee of Five Dollars.

Attendance upon these lectures is made optional with the student.
Preliminary Term to Session of 1877.
Recitations and Lectures.

A Preliminary Course of Lectures and Recitations on the Principles and Practice of Medicine, Surgery, Anatomy, Obstetrics, Diseases of Women, Physiology and their auxiliary branches, will be given, consisting of two terms, commencing on the second Thursday in September, 1876, and continuing until March first, 1877. Opportunity will be afforded for private dissection, commencing on the second Thursday in December. Material for dissection will be furnished at cost. Daily demonstrations will be made by the Instructor in Anatomy. The fees of the above Course will be $30 a term.

Corps of Instructors.
Prof. W. Carpenter, Theory and Practice.
Prof. P. Collier, Analytical Chemistry and Toxicology.
Prof. A. P. Grinnell, General Surgery, and Physiology.
Dr. H. H. Atwater, Obstetrics, and Diseases of Women and Children.
Dr. L. M. Bingham, General and Special Anatomy and Histology.
Dr. George C. Briggs, Materia Medica.

Regular Term.

The Regular Winter Course of Lectures, for the Session of 1877, will commence on the second Thursday of March, and will continue sixteen weeks. This course will consist of from five to six Lectures daily in the various Departments of Medicine and Surgery.

Fees for the Regular Session.
Matriculation Fee, Payable each Term.................. $5.00
Fees for the Full Course of Lectures by All the Professors........................................... 70.00
Graduation Fee............................................... 25.00

Material for dissection will be furnished at cost.
The tickets are to be taken out at the beginning of the Session.
Students who have already attended two full courses of lectures in other regular schools, are admitted on paying the matriculation fee and $25.

Students who have attended two full courses in this College, or who, having attended one full course in some regularly established medical school, and one full course in this College, are admitted to a third course of lectures on paying the matriculation fee only.

Graduates of this school are admitted without fee. Graduates of other regular schools, and Theological Students, are admitted on general ticket, by paying the matriculation fee.

**Requirements for Graduation.**

Candidates for the degree of Doctor of Medicine, before presenting themselves for examination, must have attended two full courses of Lectures—the latter in this College. They must have studied medicine three years, under the direction of a regular physician or surgeon, and have attained the age of twenty-one years.

Each candidate is required to write a thesis on some subject connected with medicine, and to deposit it, together with his graduation fee, with the Dean of the Faculty, one month before the close of the Session. Full certificates of the time of study, of age, and of moral character, must also be furnished. They must also pass a satisfactory examination before the Medical Faculty, and Board of Medical Examiners appointed by the State Medical Society.

*Two full Courses of Lectures are absolutely required, and no period of practice will be taken as an equivalent for one course.*

To prevent any misunderstanding with regard to the requirements for graduation, the Faculty desire to state that the only Courses of Lectures recognized, are those taken at Medical Colleges, recognized by the American Medical Association. The Tickets, Diplomas of Eclectic, Homœopathic, or Botanic Colleges, or Colleges devoted to any special system of Medicine, are considered irregular, and will not be recognized under any circumstances. Certificates from preceptors, who practice any peculiar system of Medicine, or who advertise, or violate in any way the Code of Ethics adopted by the Profession, will not be received, under any circumstances, even if the preceptors be regular graduates in Medicine.

Graduates of other regular Colleges, who desire a degree from this institution, must pass a satisfactory examination in the branches of Medicine, Surgery and Obstetrics; and if they be graduates of more than three years standing, they must exhibit a certificate of membership in some Medical Society, entitled to representation in
the American Medical Association. They will be required to pay the matriculation and the graduation fee. No thesis is required. Letters requiring information should be directed to Prof. A. P. Grinnell, Dean of the Faculty.

Students are requested, on their arrival in the City, to call at the office of A. P. Grinnell, and register their names, and they can at the same time obtain all necessary information and assistance.

**BOARD.**

Board may be obtained from $4 to $6 per week. Good accommodations furnished students who wish to board themselves. Many adopt this method, at a great reduction of expense. Students who intend to board themselves will find to their advantage to come provided with such bedding and culinary articles as they can conveniently bring with them from home.

**PRIZES.**

**Faculty Prize:** A Prize of twenty-five dollars will be awarded by the Faculty for the best Graduating Thesis. All Theses competing for this prize must be handed in one month before the close of the session.

Prof. Little will give a prize for the best examination in Surgery.

Prof. Holton will give a prize for the best examination in Materia Medica and General Pathology.

Prof. Carpenter will give a prize for the best Essay on any subject connected with Practical Medicine.

Prof. Calkins will give a prize to the student who passes the best examination on his Lectures on Physiology.

Prof. King will give a prize for the best examination in Obstetrics.

**Award of Prizes.**

The following were the Prizes awarded at the Commencement, held June 27th, 1876, in accordance with the terms announced in the Catalogue of 1875.

The Faculty Prize of $25, for the best Graduating Thesis, was awarded to David F. Rugg, of Vermont, for a Thesis on Anesthetics.
Honorable mention was also made of the following Thesis: A Thesis on Cholera Infantum by WM. B. GIBSON, of Canada.

The Prize of a Stethoscope, offered by Prof. Carpenter, was awarded to WM. B. GIBSON, of Canada, for Essay on Typhoid Fever.

The Prize of a case of Surgical Instruments, offered by Prof. Little, for the best examination in Surgery, was awarded to E. H. TOWNSEND, of Vermont.

Honorable mention was also made of WM. B. GIBSON, of Canada.

The Prize of a Hypodermic Syringe and Thermometer Case, offered by Prof. Holton, for the best examination in Materia Medica, was awarded to H. M. NASH, of Rhode Island.

The Prize of two volumes, Dalton’s and Sanderson’s Physiology, offered by Prof. Calkins, for the best examination in Physiology, was awarded to J. S. COOLEY, of N. Y.

The Prize of an Obstetric Case of Instruments, offered by Prof. King, was awarded to H. H. DEANE, of Vermont.

---

**TEXT BOOKS AND WORKS OF REFERENCE.**

The work first named, on each subject, is preferred.

**ON ANATOMY:** Grey, Wilson, Holden’s Manual, Wilson’s Dissector.

**ON PHYSIOLOGY:** Dalton’s Human Physiology; Carpenter’s Principles of Human Physiology; Flint’s.

**ON CHEMISTRY:** Fowne’s, (Revised); Barker’s; Bowman’s Medical Chemistry.

**ON THEORY AND PRACTICE:** Flint, Tanner, Watson, Aiken, Reynolds, Neimeyer, Delafield’s Post Mortem Examinations; Williams’ Principles of Medicine.

**ON OBSTETRICS:** Leishman; Bedford; or Cassaux

**ON DISEASES OF WOMEN:** Thomas, or Barnes.

**ON MATERIA MEDICA:** Biddle’s; Waring’s Practical Therapeutics; Ringer’s Therapeutics; U. S. Dispensatory.

**ON SURGERY:** Bryant, Erichson, Gross, Druitt, (Eng. Ed.); Paget’s Surgical Pathology; Billroth’s Surgical Pathology; Heath’s Minor Surgery and Bandaging.

**ON DISEASES OF THE EYE AND EAR:** Roosa, on Disease of the Ear; Lawson, on Disease of the Eye; Stellwag, on Disease of the Eye.

**ON MEDICAL JURISPRUDENCE:** Ordronaux.

**ON DISEASES OF CHILDREN:** Steiner; Smith; West.

**ON DISEASES OF THE SKIN:** Fox; Piffard; Liveing.

**ON DISEASES OF THE NERVOUS SYSTEM:** Hammond.

To L. C. Butler, M. D.,

Pres. VI. State Medical Society:

SIR,—We have the honor to inform you, that as delegates from the Vermont Medical Society, to attend the examination of candidates for the Degree of M. D. from the University of Vermont, we have discharged the duty assigned us, and most respectfully report as follows, viz: That we were present and participated in the examinations of candidates with the full Board of Medical Professors; that we were perfectly satisfied with the scholarly acquirements of all those who received the vote of approval from the Medical Faculty, and that they had individually fulfilled all the requirements entitling them to the Degree of Doctors in Medicine. We will also add, that in their examinations they gave evidences of having received thorough practical instruction from the Medical Faculty of the University of Vermont.

We are very respectfully

Your ob't serv't's,

S. S. Clarke, M. D.  

Saml. W. Thayer, M. D.  

Delegates.
OFFICERS FOR THE YEAR 1876-'77.

PRESIDENT.
M. H. HENRY, A. M., M. D., 157 W. 34th Street, New York City.

VICE PRESIDENTS.
B. W. CARPENTER, M. D., Vt.
Harvey F. Cram, M. D., Vt.
Lucius J. Dixon, M. D., Vt.
Edward Bradley, A. M. M. D., N. Y.
J. H. Baxter, M. D., D. C.
A. H. Chesmore, M. D., Vt.

B. S. Bigelow, M. D., Mich.
S. M. Roberts, M. D., N. Y.
Edward B. Nims, M. D., Mass.
Albert Reynolds, M. D., Iowa.
E. W. Bartlett, M. D., Wis.
D. P. Webster, M. D., Vt.

RECORDING AND CORRESPONDING SECRETARY.
CHARLES P. THAYER, M. D., Burlington, Vt.

TREASURER.
LEROY M. BINGHAM, M. D., Burlington, Vt.

EXECUTIVE COMMITTEE.
P. J. KENT  D. S. KELLOGG  A. D. TAGERT.

Graduates of the Medical Department of the University of Vermont are requested to send their address, and also the address of any other graduates they may have, to the Secretary of the Alumni Association, at Burlington, Vermont, as it is important that a complete and accurate register of the Alumni be procured for the contemplated general catalogue.

C. P. THAYER, M. D.,
Burlington, Vermont.
