Twenty-Fifth
ANNUAL ANNOUNCEMENT.
MEDICAL DEPARTMENT

University of Vermont.
FOR THE YEAR 1878.
Board of Trustees.
1878.

Matthew Henry Buckham, A. M.,
Horace Fairbanks,
President.

HORACE FAIRBANKS,
Ex-Officio.
Governor of the State.

On the part of the University of Vermont:
Rev. Henry Pearl Hickok,
Oliver Phelps Chandler,
Henry Loomis,
Rev. Clark Ela Ferrin, A. M.,
Rev. Charles Carroll Parker, D. D.,
Lawrence Barnes,
Albert Leonard Catlin,
Leverett Brush Englesby, A. M.,
Worthington C. Smith.

On the part of the State Agricultural College:
Rev. Horace Herrick,
Justin Smith Morrill, LL. D., 1869—1875.
Samuel H. Stevens,

Horace Fairbanks,
Paul Dillingham, A. M., 1871—1877.
Henry Clark, A. M.,

George Grenville Benedict, A. M., 1873—1879.
Henry D. Holton, M. D.,

George Grenville Benedict, A. M., Secretary.

Nathan Strong Hill, Treasurer.
TWENTY-FIFTH
Annual Announcement
OF THE
MEDICAL DEPARTMENT
OF THE
University of Vermont
AND
STATE AGRICULTURAL COLLEGE,
BURLINGTON, VT.,
FOR THE YEAR 1878.

BURLINGTON, VT.:
R. S. STYLES, STEAM BOOK AND JOB PRINTER.
1877.
FACULTY OF MEDICINE.

SAMUEL WHITE THAYER, M. D., A. M., LL. D., Burlington, Vt., Emeritus Professor of General and Special Anatomy.
Consulting Surgeon to Mary Fletcher Hospital.

WALTER CARPENTER, M. D., Burlington, Vt., Professor of the Theory and Practice of Medicine.
Physician-in-chief to Mary Fletcher Hospital and Dean of the Faculty.

JOHN OIRDRONAUX, M. D., LL. D., New York City, Emeritus Professor of Medical Jurisprudence.

WILLIAM DARLING, A. M., M. D., F. R. C. S., New York City, Professor of General and Special Anatomy.
A. P. A. KING, M. D., Washington, D. C., Professor of Obstetrics and Diseases of Women.
Consulting Physician to Mary Fletcher Hospital.

HENRY D. HOLTON, M. D., Brattleboro, Vt., Professor of Materia Medica and General Pathology.
Consulting Surgeon to Mary Fletcher Hospital.

MARTSHALL CALKINS, A. M., M. D., Springfield, Mass., Professor of Physiology and Microscopic Anatomy.

JAMES L. LITTLE, M. D., New York City, Professor of the Principles and Practice of Surgery.
Surgeon-in-chief to Mary Fletcher Hospital.

GEORGE S. SMYTH, Ph. D., University Professor of Chemistry and Toxicology.

PROFESSORS ON SPECIAL SUBJECTS.

WILLIAM A. HAMMOND, M. D., New York City, Professor of Diseases of the Mind and Nervous System.

ROBERT W. TAYLOR, M. D., New York City, Professor of Diseases of the Skin.
A. P. GRINNELL, M. D., Burlington, Vt., Professor of Diseases of the Heart and Lungs.
Physician to Mary Fletcher Hospital.

STEPHEN M. ROBERTS, M. D., New York City, Professor of Diseases of Children.
A. T. WOODWARD, M. D., Brandon, Vt., Professor of the Surgical Diseases of Women.
Consulting Physician to Mary Fletcher Hospital.

EDWARD S. PECK, A. M., M. D., Professor of Diseases of the Eye and Ear.

LEROY M. BINGHAM, M. D., Burlington, Vt., Demonstrator of Anatomy, and Assistant to the Chair of Surgery.
Attending Surgeon to Mary Fletcher Hospital.

H. H. ATWATER, M. D., Burlington, Vt., Instructor in Obstetrics and Diseases of Women.
W. B. LUND, M. D., Burlington, Vt., Instructor in Materia Medica.

FRANK R. AINSWORTH, Assistant Demonstrator of Anatomy.

WM. C. REEVES, Jr., M. D., New York City, Assistant to the Chair of Diseases of the Mind and Nervous System.

A. P. GRINNELL, M. D., Secretary.
ANNUAL ANNOUNCEMENT.

1878.

The Faculty of the Medical Department of the University of Vermont, in issuing their Twenty-Fifth Circular and Catalogue, take pleasure in announcing the continued success and uninterrupted progress of the Institution under its present improved management.

LOCATION.

The Medical College is situated near the University buildings, and upon an eminence overlooking the city of Burlington, Lake Champlain and the Adirondack chain of mountains. For beauty of scenery and salubrity of climate its situation is not surpassed by any Institution of learning in the country. The building is of brick, well ventilated, and provided with two commodious lecture rooms and amphitheatre, two large, well-lighted dissecting rooms, and in every way perfectly adapted for clinical and scholastic teaching. It contains a large museum, composed of a great number of Osteological and Vascular preparations, both wet and dry, and is open to the students during the session.

Plan of Instruction.

The plan of instruction adopted by this Institution, consists of a complete course of the scholastic lectures, by able Professors in the seven essential branches of Medical Science, viz.: Anatomy, Physiology, Materia Medica, Chemistry, Surgery, Obstetrics, and the Theory and Practice of Medicine.

In order to render the course of instruction as thorough as possible, the Faculty have selected a number of gentlemen to lecture upon special subjects. Such parts of the regular course as are not taught in detail by the regular Professors will thus receive special attention by gentlemen who are acknowledged authorities in their respective specialties; each one giving a short and practical course of lectures.

This plan, which was adopted for the first time about two years ago, has been highly appreciated by the students, since it enabled
them to attain a more exact knowledge of important subjects than they could have received from the general lecture courses.

The Faculty take pleasure in again announcing the names of Professors Robert W. Taylor, A. P. Grinnell, Stephen W. Roberts, Wm. A. Hammond, and A. T. Woodward, who will lecture on their respective branches, as during the last session.

The Faculty also take pleasure in stating that the chair of Disease of the Eye and Ear, which has been so ably filled during the past two years by Prof. D. B. St. John Roosa, will be occupied by Dr. E. S. Peck, who has just returned from Europe, after having spent two years in making preparations for this important department of instruction.

The Faculty wish to call special attention to the fact that these lectures on special subjects are delivered during the regular session, and not in the preliminary term, as is the custom in most Colleges.

GENERAL OUTLINE OF THE COURSE OF LECTURES.

Practice of Medicine.

PROF. WALTER CARPENTER.

The course of instruction in this department will be thorough, and such as will enable the student to become acquainted with the pathology and treatment of special diseases, and supply him with the necessary knowledge to observe the phenomena of disease. The Lectures will be illustrated with morbid specimens and casts.

General, Descriptive, and Surgical Anatomy.

PROF. WILLIAM DARLING.

As a teacher in this department, Prof. Darling has no superior, as those who have listened to his lectures in both the Universities of Vermont and New York can testify. He is the only person in this country who is a Fellow of the Royal College of Surgeons, England, by examination. His lectures will be illustrated by demonstrations upon the cadaver, as well as by plates and diagrams. For the acquirement, therefore, of a thorough and practical knowledge of Anatomy, this Institution offers the student superior advantages.
Obstetrics, and Diseases of Women.

PROF. A. F. A. KING.

Prof. King holds the same chair in the Columbian University, at Washington, D. C., and is one of the attending physicians to Providence Hospital in that city.

This course will comprise a series of lectures on the Science and Practice of Midwifery, together with additional lectures on Gynecology. The lectures on Obstetrics will be illustrated by an elaborate collection of life-sized diagrams, together with natural preparations and papier mâché models, exhibiting the anatomy and physiology of reproduction in all its stages. The mechanism and practical management of natural and preter-natural labors will be demonstrated on appropriate manikins, and obstetrical instruments of all kinds will be exhibited and their uses fully explained.

The department of Gynecology, which has of late obtained so great a prominence in medical practice, will be thoroughly taught, both as regards theory and practice, and all instrumental and other appliances required in treating the Diseases of Females will be presented. A complete assortment of instruments and a new collection of colored diagrams will form an attractive feature in this department.

Materia Medica and General Pathology.

PROF. HENRY D. HOLTON.

In this department, especial attention will be paid to the physiological effects, and the therapeutical adaptation of remedies, with particular reference to their practical application, amply illustrated by experiments on living animals. Pathological specimens, both wet and dry, will also be used in illustration of different pathological conditions.

Physiology and Microscopic Anatomy.

PROF. MARSHALL CALKINS.

The lectures in this department will be illustrated, as far as possible, by experiments on animals, the use of the stereopticon and microscopes, in order to exhibit to the student their more important facts and principles; more especially will the general functions of
human physiology receive attention, and the relations of normal and abnormal life be described. Histological illustrations will be ample, as several excellent microscopes will be furnished for the more full elucidation of this branch of study.

**Principles and Practice of Surgery.**

**PROF. JAMES L. LITTLE.**

The lectures on the Principles and Practice of Surgery will be both scholastic and clinical. They will be given by Prof. Little, who for many years has held the position of lecturer on Operative Surgery and Surgical Dressings, in the College of Physicians and Surgeons of New York, and who is one of the Surgeons to St. Luke's and St. Vincent's Hospitals in that city.

All the important surgical operations will be performed on the dead body, and the use of surgical instruments and appliances will be demonstrated to the class. These lectures will be illustrated by a fine collection of plates, diagrams and models. A Clinique will be held every Saturday, during the surgical course, when every facility will be afforded the class for witnessing all necessary surgical operations.

**Chemistry and Toxicology.**

The lectures in this department relate to the fundamental doctrines of chemistry, or chemical philosophy, to inorganic substances, and to the chemistry of the vegetable and animal kingdom. Toxicology, or the science of Poisons, a subject of the greatest importance to the practitioner, both in its pathological and medico-legal relations, receives special consideration. In connection with this course a chemical laboratory is established, in which students who desire it are instructed in analytical chemistry, and particularly in the examination of the various organs, secretions and excretions of the human body. Students are taught the more simple and accurate methods of making analysis of the blood, milk, urine, etc., with particular reference to their duties as medical practitioners.
Lectures on Special Subjects.

The Faculty being desirous of extending to the students every facility for the study of special departments of medicine, have established the following special courses, which will be extended hereafter, and it is believed, that with this addition to the regular curriculum, the advantages thus afforded by this College are unsurpassed by any medical institution outside of our large cities.

Diseases of the Skin.

Prof. Robt. W. Taylor, one of the physicians to Charity Hospital, New York, whose labors in this department of medicine are well known to the Profession, will deliver a course of lectures on this subject, illustrated by plates, diagrams and microscopic specimens. He will also hold several clinics; thus, giving the students an opportunity of becoming familiar with the latest views on the subject of dermatology.

Diseases of Children.

Prof. Stephen M. Roberts will deliver a course of lectures on Diseases of Infancy and Childhood, a department of study generally either completely ignored, or but very superficially treated, although of the utmost importance to the practising physician.

Diseases of the Heart and Lungs.

Prof. A. P. Grinnell will give instruction in this department. A knowledge of auscultation and percussion, and of cardiac and pulmonary affections, constituting one of the most necessary elements in the acquisitions of the practitioner, will be taught in the most practical manner, so as to render the student every facility for becoming expert in the diagnosis of thoracic diseases.

Diseases of the Mind and Nervous System.

The course of Lectures on Diseases of the Mind and Nervous System will be delivered by Dr. Wm. A. Hammond, who occupies a like chair in the University of the City of New York. The lectures will be both clinical and didactic, and will have special reference to the improved methods of research and treatment established by the most recent investigations. Electricity, in its relations to the ner-
vous system, both in health and disease, will be the subject of particular attention.

**Surgical Diseases of Women.**

Dr. A. T. Woodward, of Brandon, Vt., will give, during the first part of the session, a course of lectures on the Surgical Diseases of Women. The lectures will embrace subjects to which Dr. Woodward has for many years given special attention.

**Diseases of the Eye and Ear.**

Prof. E. S. Peck, who has just returned from abroad, having passed two years in Vienna, Berlin and Paris, preparing himself for this chair, will deliver a course of ten lectures, thoroughly illustrated. He will hold several cliniques during his course, so that the student will be able to witness most of the important operations in this department.

---

**COLLEGE CLINIQUEs.**

The following Cliniques will be held within the College building during the regular term. Patients presenting themselves at these Cliniques, for advice and treatment, are examined, and the peculiarities of each case explained, the appropriate treatment prescribed, and the requisite surgical operations performed before the class:

A Surgical Clinique will be held by Prof. Little every Saturday morning, from 9 to 12 o'clock, during the last half of the session. A large number of Surgical operations are performed at these cliniques.

A Medical Clinique will be held by Prof. Carpenter on Wednesday morning, during the first half of the term.

A Clinique for Diseases of the Eye and Ear, by Prof. Peck, will be held during his course of Lectures.

A Clinique for Diseases of the Skin, by Prof. Taylor, will be held during Prof. Taylor's course of Lectures.

A Clinique for Diseases of Children will be held by Prof. Roberts.

A Clinique for Diseases of the Nervous System will be held during Prof. Hammond’s course of Lectures.

Due notice of the time of holding the above Cliniques will be given.
The Mary Fletcher Hospital.

In addition to the College Cliniques, it is the special privilege of the Faculty to announce that through the munificent liberality of Miss Mary Fletcher, of Burlington, Vt., the sum of $185,000 has been donated from her private funds for the building of a magnificent General Hospital, immediately adjoining the University grounds.

This Institution, the erection of which—it is to be hoped, will be completed before the next lecture term—will afford excellent facilities for clinical teaching in both Medical and Surgical practice.

The new hospital will be constructed upon the most improved modern plan, and contain a large and commodious amphitheatre in which the medical class can witness the surgical operations.

The Institution will also be provided with suitable appurtenances for the chemical and microscopic investigation of disease, the results of which will be presented to the students by their clinical teachers; and thus the advancement of medical education and the promotion of medical science will be added to the blessings so freely bestowed upon suffering humanity by Miss Fletcher's noble charity.

The Professors of the Medical Department of the University will deliver clinical lectures in the Hospital during the regular College term.

The following is the Medical and Surgical Staff of the Hospital:

**Physician-in-Chief.**
Prof. Walter Carpenter.

**Surgeon-in-Chief.**
Prof. J. L. Little.

**Consulting Physicians.**
Prof. A. F. A. King,
Dr. O. F. Fassett,
Prof. A. T. Woodward,

**Consulting Surgeons**
Prof. S. W. Thayer,
Prof. H. D. Holton,
Dr. Samuel Allen.

**Attending Physicians.**
Prof. A. P. Grinnell,
Dr. J. H. Richardson,

**Attending Surgeons.**
Dr. J. O. Cramton,
Dr. L. M. Bingham.
PRELIMINARY TERM TO SESSION OF 1878.

Recitations and Lectures.

A Preliminary Course of Lectures and Recitations on the Principles and Practice of Medicine, Surgery, Anatomy, Obstetrics, Diseases of Women, Physiology and their auxiliary branches, will be given on the first Thursday of November, 1877, and continue until March first, 1878. Opportunity will be offered for private dissection, commencing on the second Thursday in December. Material for dissection will be furnished at cost. Daily demonstrations will be made by the Instructor in Anatomy. The fee of the above course will be $30.

Corps of Instructors.

Prof. W. Carpenter, Theory and Practice.
Prof. A. P. Grinnell, General Surgery and Physiology.
Dr. H. H. Atwater, Obstetrics and Diseases of Women and Children.
Dr. L. M. Bingham, General and Special Anatomy and Histology.
Dr. W. B. Lund, Materia Medica.

Regular Term.

THE REGULAR WINTER COURSE OF LECTURES,

For the session of 1878, will commence on the first Thursday of March, and will continue sixteen weeks. This course will consist of from five to six Lectures daily in the various Departments of Medicine and Surgery.

FEES FOR THE REGULAR SESSION.

Matriculation Fee, Payable Each Term........... $5 00
Fees for the Full Course of Lectures by All the Professors.......................... 70 00
Graduation Fee........................................... 25 00
Students who have already attended two full courses of lectures in other regular schools, are admitted on paying the matriculation fee and $25.

Students who have attended two full courses in this College, or who, having attended one full course in some regularly established medical school, and one full course in this College, are admitted to a third course on paying the matriculation fee only.

Graduates of this school are admitted without fee. Graduates of other regular schools, and Theological Students, are admitted on general ticket, by paying the matriculation fee.

Requirements for Graduation.

Candidates for the degree of Doctor of Medicine, before presenting themselves for examination, must have attended two full courses of Lectures—the latter in this College. They must have studied medicine three years, under the direction of a regular physician or surgeon, and have attained the age of twenty-one years.

Each candidate is required to write a thesis on some subject connected with medicine, and to deposit it, together with his graduation fee, with the Dean of the Faculty, one month before the close of the Session. Full certificates of the time of study, of age, and of moral character, must also be furnished. They must also pass a satisfactory examination before the Medical Faculty, and Board of Medical Examiners appointed by the State Medical Society.

Two full Courses of Lectures are absolutely required, and no period of practice will be taken as an equivalent for one course.

To prevent any misunderstanding with regard to the requirements for graduation, the Faculty desire to state that the only Courses of Lectures recognized, are those taken at Medical Colleges, recognized by the American Medical Association. The Tickets, Diplomas of Eclectic, Homœopathic, or Botanic Colleges, or Colleges devoted to any special system of Medicine, are considered irregular, and will not be recognized under any circumstances. Certificates from preceptors, who practice any peculiar system of Medicine, or who advertise, or violate in any way the Code of Ethics adopted by the Profession, will not be received, under any circumstances, even if the preceptors be regular graduates in Medicine.

Graduates of other regular Colleges, who desire a degree from this institution, must pass a satisfactory examination in the branches of Medicine, Surgery and Obstetrics; and if they be graduates of more than three years’ standing, they must exhibit a certificate of member-
ship in some Medical Society, entitled to representation in the American Medical Association. They will be required to pay the matriculation and the graduation fee. No thesis is required.

Letters requiring information should be directed to Prof. A. P. GRINNELL, Secretary of the Faculty.

BOARD.

Board may be obtained from $4 to $6 per week. Good accommodations furnished students who wish to board themselves. Many adopt this method, at a great reduction of expense. Students who intend to board themselves will find it to their advantage to come provided with such bedding and culinary articles as they can conveniently bring with them from home.

Faculty Prizes.

To take the place of the prizes which have heretofore been open to the graduating class, the Faculty have established two prizes for general proficiency in examination. A First Prize of Fifty Dollars, and a Second Prize of Twenty-Five Dollars. These prizes will be awarded as follows:

Members of the graduating class who have secured the highest marks of the Professors, in the stated examination for the College degree, will be considered candidates for a special competitive examination in writing.

A Prize of Twenty-Five Dollars will be awarded for the best Graduating Thesis.

AWARD OF PRIZES. SESSION OF 1877.

The prize offered by Prof. Calkins for the best examination in Physiology was awarded to Willis A. Tenny, of Winooski, Vt.

Honorable mention was made of Fred. S. Langdon, of Burlington, Vt.

The prize offered by Prof. Little for the best examination in Surgery was awarded to Walter R. Pike, of Salt Lake City, Utah Ter.

Honorable mention was made of W. A. Tenny, Winooski, Vt.
The prize offered by the Faculty for the best Thesis was awarded to Andrew J. Willard, of Burlington, Vt.; with the recommendation that he publish the Thesis.

Honorable mention was made of Walter R. Pike, of Utah.

The prize offered by Prof. Carpenter for the best Essay relating to The Theory and Practice of Medicine was awarded to William G. Robinson, of Montreal.

The prize offered by Prof. King for the best examination on Obstetrics and Gynecology was awarded to Julius A. Howard, of Brandon, Vermont.

Honorable mention was made of Fred. S. Langdon, of Burlington, Vermont.

---

**Text Books and Works of Reference.**

The work first named, on each subject, is preferred.

**On Physiology:** Dalton's Human Physiology, Carpenter's Principles of Human Physiology, Flint's.

**On Chemistry:** Fowne's (Revised,) Barker's, Bowman's Medical Chemistry.

**On Theory and Practice:** Flint, Tanner, Watson, Aiken, Reynolds, Neimeyer, Delafield's Post Mortem Examinations, Williams' Principles of Medicine.

**On Obstetrics:** Leishman, Playfair.

**On Diseases of Women:** Thomas, or Barnes. Barker.

**On Materia Medica:** Biddle, Waring's Practical Therapeutics, Ringer's Therapeutics, U. S. Dispensatory.

**On Surgery:** Erichson, Bartholow, Bryant, (Eng. Ed.,) Gross, Paget's Surgical Pathology, Billroth's Surgical Pathology, Heath's Minor Surgery and Bandaging.

**On Diseases of the Eye and Ear:** Roosa, on Disease of the Ear; Lawson on Disease of the Eye; Stellwag, on Disease of the Eye.

**On Medical Jurisprudence:** Ordronaux.

**On Diseases of Children:** Steiner, Smith, West.

**On Diseases of the Skin:** Fox, Piffard, Liveing.

**On Diseases of the Nervous System:** Hammond.

BURLINGTON, VT., SEPTEMBER 3, 1877.

GEO. DUNSMORE, M. D.,
President Vermont Medical Society:

SIR,—

The following report of the Delegates of the Vermont Medical Society to the Medical Department of the University of Vermont is respectfully submitted:

The Delegates were cordially received by the Medical Faculty. They participated in the examination of the graduating class.

The candidates for the Degree of Doctor of Medicine were subjected to a rigid examination in the several branches of Medicine, Surgery, and Obstetrics, and their attainments carefully tested.

We believe that the gentlemen who received diplomas were fairly entitled to them by the creditable proficiency they evinced in their professional studies, and by having complied with the conditions usually imposed by regular schools of medicine, as to time of study, thesis, age, and character.

WM. B. LUND,} Delegates.
E. F. UPHAM,}
THE AMERICAN MEDICAL COLLEGE ASSOCIATION.

THE AMERICAN
Medical College Association.

The Provisional Association of American Medical Colleges met in Chicago on Saturday, June 2d, pursuant to the call of its President. On Monday, June 4th, it adjourned sine die, and a permanent organization, known as the American Medical College Association, entered upon its career. The Colleges present (through their delegates, twenty-three in number,) signed the Constitution, By-Laws, and Articles of Confederation. The following are the Articles of Confederation agreed upon:

ARTICLES OF CONFEDERATION.

(To be subscribed and confirmed to by all the Colleges of the Association.)

ARTICLE I. OF THE FACULTY.

The medical members of the Faculty must be regular graduates or licentiates and practitioners of medicine in good standing, using the word "regular" in the sense commonly understood in the medical profession.

ARTICLE II. OF TUITION.

SEC. 1. The scheme of tuition shall provide for a yearly systematic course of instruction covering the general topics of Anatomy, including dissections, Physiology, Chemistry, Materia Medica, and Therapeutics, Obstetrics, Surgery, Pathology, and Practice of Medicine. The collegiate session wherein this course is given shall be understood as the "regular" session.

ARTICLE III. REQUIREMENTS FOR GRADUATION.

No person, whether a graduate in Medicine or not, shall be given a Diploma of "Doctor of Medicine" who shall not have fulfilled the following requirements, except as hereinafter provided for in Article IV:

1. He must produce satisfactory evidence of good moral character, and of having attained the age of twenty-one years.

2. He must file a satisfactory certificate of having studied medicine for at least three years under a regular graduate, or licentiate and practitioner of medicine, in good standing, using the word "regular" in the sense commonly understood in the medical profession. No candidate shall be eligible for final examination for graduation unless his term of three years' study shall have been completed, or shall expire at a date not later than three months after the close of the final examinations. This section to take effect at and after the session of 1879-80.
3. He must file the proper official evidence that, during the above-mentioned three years, he has matriculated at some affiliated college, or colleges, for two regular sessions, and in the course of the same (except as provided in 4), has attended two full courses of instruction on the seven topics mentioned in Article II. But the latter, at least, of the two full courses must have been attended at the College issuing the Diploma. No two consecutive courses of instruction shall be held as satisfying the above requirements unless the time between the beginning of the first course and the end of the second is greater than fifteen months.

4. In case a College shall adopt a systematic graduated scheme of tuition, attendance on the whole of the same shall be equivalent to the requirements mentioned in 3, provided such scheme includes instruction in the seven topics mentioned in Article II, and require attendance at least at two yearly regular collegiate sessions of not less than twenty weeks' duration each.

5. The candidate must have passed a personal examination before the Faculty on all seven of the branches of medicine mentioned in Article II.

6. He must have paid in full all college dues, including the graduation fee.

**ARTICLE IV. Of Honorary Degrees.**

An honorary degree of "Doctor in medicine" may be granted, in numbers not exceeding one yearly, to distinguished physicians or scientific men of over forty years of age. But in such case the diploma shall bear across its face the word "Honorary" in conspicuous characters, and the same word shall always be appended to the name of the recipient in all lists of graduates.

**ARTICLE V. Of Fees.**

SEC. 1. All fees shall be paid in lawful money, and no promissory notes or promises to pay shall be accepted in lieu of cash for payment of fees.

SEC. 2. No ticket or other certificate of attendance upon college exercises shall be issued to any student until the dues for the same shall have been fully paid.

SEC. 3. The established fees for the exercises of the regular session—except the matriculation fee, graduation fee, fee for dissections—may be reduced not more than one half to graduates of other affiliated colleges of less than three years' standing, and to undergraduates of the same who have already attended two full courses of the instruction of the regular session.

SEC. 4. The same fees may be remitted altogether to a college's own alumni, to graduates of other affiliated colleges of three years' standing (the three years dating from the time of graduation, and ending at the close of the regular session for which the tickets are given), to undergraduates who have already attended two full courses of the instruction of the regular session, the latter of which at least shall have been in the college making the remission, and to theological students, when not candidates for a diploma.

SEC. 5. The same fees may be reduced or remitted to deserving, indigent students, to a number not exceeding five per cent. of the number of matriculates at the previous regular session of the college.
SEC. 6. Under no circumstances whatever other than the above shall the faculties, or any members of the same, grant upon their own authority any remissions or reductions of established fees. And it is distinctly understood and agreed that the faculties will discontinue and oppose the authorizing by governing boards of the admission of individual students on other than the regularly established charges for their grade.

SEC. 7. Remission or reduction of fees for other exercises than those of the regular session, return to a student of any moneys after payment of fees, or an appropriation of funds of the college for payment of any student's fees, or part thereof, shall be deemed violation of the provisions of this article in regard to remission or reduction of fees.

ARTICLE VI. OF RECOGNITION OF OTHER COLLEGES.

No College shall admit to the privileges accorded in Articles III and V the students or graduates of any College which, during any period of the student's or graduate's pupilage, shall have been excluded from the list of affiliated Colleges recognized by the Association.

ARTICLE VII. AMENDMENTS.

Amendments to these Articles shall be proposed and adopted in the manner prescribed for amendments to the Constitution.
THE

Medical Alumni Association.

PRESIDENT:
EDWARD BRADLEY, A. M., M. D.,
1 West 24th Street, New York City.

RECORDING AND CORRESPONDING SECRETARY:
CHARLES P. THAYER, M. D.,
BURLINGTON, VT.

TREASURER:
LEROY M. BINGHAM, M. D.,
BURLINGTON, VT.

Graduates of the Medical Department of the University, and Alumni of the University who have taken their Medical Degree elsewhere, in good standing, are considered members of the Association, and upon payment of the yearly dues, are entitled to and will receive annually, a Catalogue of the Medical Department and a copy of the Annual Proceedings of the Association.—providing they furnish the Secretary with their Post Office address.

If you are a graduate, please furnish the Secretary with your name, date of graduation, Post Office address, (and that of any other graduate you may know,) together with $1, and your name will be placed in its proper place in the contemplated General Catalogue.

Address,

Dr. C. P. THAYER,
Burlington. Vt.
