THIRTY-NINTH
Annual Announcement
OF THE
MEDICAL DEPARTMENT
OF THE
University of Vermont
AND
STATE AGRICULTURAL COLLEGE.
(Organized in 1791.)
BURLINGTON, VERMONT.
FOR THE YEAR 1892.

BURLINGTON, VT.:
R. S. STYLES, STEAM BOOK AND JOB PRINTER.
1891.
Faculty of Medicine.

MATTHEW HENRY BUCKHAM, D. D.,
Burlington, Vt., President.

JOHN ORDROUX, M. D., LL. D.,
New York City.
Emeritus Professor of Medical Jurisprudence.

J. WILLISTON WRIGHT, A. M., M. D.,
New York City,
Emeritus Professor of the Principles and Practice of Surgery.

WALTER CARPENTER, M. D.,
Burlington, Vt.,
Emeritus Professor of the Principles and Practice of Medicine.

ALBERT F. A. KING, A. M., M. D.,
Washington, D. C.,
Professor of Obstetrics and Diseases of Women.

ASHBEL PARMELEE GRINNELL, M. D.,
Burlington, Vt.,
Professor of the Theory and Practice of Medicine;
Consulting Physician to Mary Fletcher Hospital, and
Dean of the Faculty.

RUDOLPH AUGUST WITTHAUS, A. B., M. D.,
New York City,
Professor of Chemistry and Toxicology.

J. HENRY JACKSON, A. M., M. D.,
Barre, Vt.,
Professor of Physiology and Microscopic Anatomy.

WILLIAM B. TOWLES, M. D.,
University of Virginia,
Professor of General and Special Anatomy.

J. H. WOODWARD, B. S., M. D.,
Burlington, Vt.,
Professor of Materia Medica and Therapeutics;
Secretary of the Faculty.

ABEL M. PHELPS, M. D.,
New York City,
Professor of Surgery;
Consulting Surgeon to Mary Fletcher Hospital;
Surgeon to the Charity Hospital, N. Y.
Professors of Special Subjects.

STEPHEN MARTINDALE ROBERTS, A. M., M. D., New York City,
Professor of Diseases of Children.

WILDER L. BURNAP, A. M., Burlington, Vt.,
Professor of Medical Jurisprudence.

GEORGE B. HOPE, M. D., New York City,
Professor of Diseases of the Throat.

E. D. FISHER, A. M., M. D., New York City,
Professor of Diseases of the Mind and Nervous System.

J. H. WOODWARD, B. S., M. D., Burlington, Vt.,
Professor of Diseases of the Eye and Ear;
Ophthalmologist to the Mary Fletcher Hospital.

WILLIAM WOTKYNES SEYMOUR, A. B., M. D., Troy, N. Y.,
Professor of Surgical Diseases of Women.

CONDICT W. CUTLER, M. S., M. D., New York City,
Professor of Dermatology and Venereal Diseases.

JOHN BROOKS WHEELER, A. B., M. D., Burlington, Vt.,
Professor of Clinical and Minor Surgery.

HENRY CRAIN TINKHAM, M. D., Burlington, Vt.,
Adjunct to the Chair of Anatomy and Demonstrator of Anatomy.

JOHN B. WHEELER, A. M., M. D.,
Instructor in Principles and Practice of Surgery;
Attending Surgeon to Mary Fletcher Hospital.

HENRY CRAIN TINKHAM, M. D.,
Instructor in Anatomy;
Attending Physician to Mary Fletcher Hospital.

J. C. RUTHERFORD, M. D.,
Instructor in Obstetrics;
Attending Physician to Mary Fletcher Hospital.

B. J. ANDREWS, M. D.,
Instructor in Physiology;
Superintendent of Mary Fletcher Hospital.

L. W. FLANDERS, M. D.,
Instructor in Materia Medica and Therapeutics.

C. S. BOYNTON, M. D.,
Instructor in Chemistry.

Faculty of the Preliminary Session, 1891-'92,

Prof. A. P. GRINNELL, M. D.,
Instructor in Theory and Practice of Medicine;
Consulting Physician to Mary Fletcher Hospital.

JOHN BROOKS WHEELER, A. M., M. D.,
Instructor in Principles and Practice of Surgery;
Attending Surgeon to Mary Fletcher Hospital.

HENRY CRAIN TINKHAM, M. D.,
Instructor in Anatomy;
Attending Physician to Mary Fletcher Hospital.

J. C. RUTHERFORD, M. D.,
Instructor in Obstetrics;
Attending Physician to Mary Fletcher Hospital.

B. J. ANDREWS, M. D.,
Instructor in Physiology;
Superintendent of Mary Fletcher Hospital.

L. W. FLANDERS, M. D.,
Instructor in Materia Medica and Therapeutics.

C. S. BOYNTON, M. D.,
Instructor in Chemistry.
The Medical Department of the University of Vermont and State Agricultural College was chartered by the State in 1823. It was organized on the present basis in 1854. The Institution is consequently one of the oldest Medical Colleges in the United States.

It has been the custom of the Medical Faculty to secure the best teachers that could be obtained. This custom has been facilitated by the fact that the regular sessions are held from March to July, when Professors in other schools are at liberty to contribute their services to the University of Vermont. The history of the College, and its present prosperity, afford abundant evidence that the working of this plan is eminently successful. Not since the organization of this Department have its prospects been brighter than they are at present. The quality of the scholastic teaching has been steadily improved; the requirements for entrance and for graduation are equivalent to those of the most advanced medical institutions; the clinical advantages have been increased from year to year, until now the clinics of this school are equalled only by those of the largest metropolitan colleges. During the session of 1892, the thirty-ninth in number since the organization of the College on its present basis, the Faculty will make every effort to provide thorough scholastic and clinical instruction in each department of Medical Science.
THE COLLEGE BUILDING.

GIFT OF MR. JOHN P. HOWARD.

The new College Building was erected in 1884. It is a substantial brick edifice, situated on Pearl Street, in the City of Burlington, on the north side of and immediately overlooking the College Park. The lecture room amphitheatre will seat comfortably three hundred and fifty students.

The laboratories for Practical Chemistry and Physiology, and the Dissecting Room for Practical Anatomy, are ample in size, and supplied with the modern conveniences and apparatus required for chemical experiments and physiological and anatomical demonstrations.

The College Museum is spacious, well lighted, and contains a large and carefully arranged collection of specimens and preparations—many of them rare—illustrating both normal and abnormal structures. The Museum is always open to the students.

The whole building is heated by steam, thoroughly ventilated, and, in all its appointments, admirably fitted for medical teaching.

PLAN OF INSTRUCTION.

The PLAN OF INSTRUCTION adopted by this Institution comprises a complete course of Lectures upon the seven branches of Medical Science, viz: Anatomy, Physiology, Chemistry, Materia Medica and Therapeutics, Surgery, Obstetrics, and the Theory and Practice of Medicine.

In order to render the instruction as thorough as possible, the Faculty have selected a number of medical gentlemen to lecture upon special subjects. Topics not treated in detail by the regular Professors will thus receive special elaboration from gentlemen who are acknowledged authorities in their respective specialties, each one giving a short and practical course of lectures.

This plan, which was adopted for the first time more than ten years ago, has been of great value to and is highly appreciated by the students.
Outline of the Course of Lectures.

OBSTETRICS AND DISEASES OF WOMEN.

Prof. A. F. A. King.

This Course will comprise a series of Lectures on the Science and Practice of Midwifery, together with additional Lectures on Gynecology. The main purpose of the lecturer will be to explain, impress and simplify the matters required to be studied in the books, so as to render them more easily intelligible, and hence more pleasing and satisfactory to the student. The Lectures will be illustrated by diagrams, models, natural preparations, manikins and instruments.

Mathieu’s Elastic Manikin, for demonstrating Obstetrical operations, is used before the Class in the Lecture Room.

In the Department of Gynecology the various instruments and appliances required in treating the Diseases of Women will be exhibited, and their uses fully explained. The pathological conditions of the female organs will be illustrated by specimens and colored diagrams; and the various Surgical operations belonging to Gynecological practice will be shown both clinically and upon the cadaver, by Prof. W. Wotkyns Seymour, Special Professor of Surgical Gynecology.

PRACTICE OF MEDICINE.

Prof. A. P. Grinnell.

In this department every effort will be made to associate didactic and clinical teaching, enabling the student to become thoroughly acquainted with the methods adopted for investigation of disease, and the practical application of remedies at the bedside.

The didactic Lectures will be illustrated by pathological specimens, charts, casts, diagrams, and micro-photographs.

From the Mary Fletcher Hospital patients will be secured, whereby the student will be brought in direct contact with the subject under discussion.

Special attention will be paid to Physical Diagnosis, thus affording to every student a knowledge of diseases of the chest, and the most improved methods of diagnosis.
CHEMISTRY AND TOXICOLOGY.

Prof. RUDOLPH A. WITTHAUS,

The instruction in this department will be adapted to the special requirements of the practitioner in medicine. The Philosophy of Chemistry will be taught in such a manner as to afford the students a firm ground-work for the rational study of the subject. Those portions of practical chemistry having a direct bearing upon physiology, pathology and therapeutics will be particularly dwelt upon, to the exclusion of those portions which are of mere technical interest. The more important application of chemistry to the science of poisons will receive particular attention.

A commodious and well appointed practical laboratory has been provided, in which special instruction is given in the chemical manipulations required in the examination of urine, in Toxicology, and in such analytical processes as are required of the physician.

PHYSIOLOGY AND MICROSCOPIC ANATOMY.

Prof. J. HENRY JACKSON.

The description of the functions of each organ and tissue is preceded by a careful examination of its minute structure. By the aid of lecture-room microscopes, sections of healthy tissues are exhibited to each student, and an opportunity is offered for special instruction in the preparation and mounting of specimens. Diagrams, models and charts furnish further help to a complete comprehension of the lectures. Such vivisections are given as can be shown with practical advantage to the whole class, and the teaching of the subject of Physiology has in view the elucidation of Pathology.

GENERAL DESCRIPTIVE AND SURGICAL ANATOMY.

Prof. WILLIAM B. TOWLES.

The lectures in this course will be fully illustrated by drawings, diagrams, models, preparations, and dissections on the cadaver. The object will be to render the instruction thoroughly practical by as complete illustration as possible of the facts taught, and by frequent examinations in preparations and dissections.
MATERIA MEDICA AND THERAPEUTICS.

Prof. J. H. Woodward.

The scope of instruction in this department will embrace a thorough and practical study of those drugs which have a real therapeutic value. The medicinal and the toxic effects, and the therapeutic uses of each, will be discussed systematically, in such a manner that the student will receive a practical knowledge of the subject, founded on a scientific basis. The methods of medication, the principles and the practice of prescription-writing, and the therapeutic uses of heat, cold, and electricity, will be taught during the course.

PRINCIPLES AND PRACTICE OF SURGERY.

Prof. A. M. Phelps.

The course on Surgery will consist of didactic and clinical lectures, illustrated by plates, diagrams, and surgical apparatus in general. All of the more important surgical operations will be performed on the cadaver before the class. On Wednesday and Saturday of each week, during the Surgical Course, a clinic will be held in the large amphitheatre of the Mary Fletcher Hospital, where the abundant supply of material, coming, as heretofore, from all parts of the State, will enable the student to witness a large number of the capital operations of surgery.

LECTURES ON SPECIAL SUBJECTS.

The Faculty being desirous of affording to the student every facility for the study of the various departments of medicine, have established the following special courses, and with this addition to the regular curriculum, the advantages afforded by this College are unsurpassed by any Medical Institution outside of our large Cities.

These lectures on special subjects are delivered during the regular session without extra expense.

The final examinations for the Degree of Doctor in Medicine will hereafter embrace the instruction given by the Professors of Special Subjects.
DISEASES OF CHILDREN.

Prof. Stephen M. Roberts, of New York City, will deliver a course of lectures upon the Diseases of Infancy and Childhood.

DISEASES OF THE EYE AND EAR.

Prof. J. H. Woodward, of Burlington, Vt., will give a course of clinical lectures on Diseases of the Eye and Ear. During this course the student will be able to study a large variety of diseases of the eye and ear, and to witness most of the important operations in this department of Surgery.

DISEASES OF THE MIND AND NERVOUS SYSTEM.

Prof. E. D. Fisher, of New York City, will deliver a course of didactic and clinical lectures on Diseases of the Mind and Nervous System. Dr. Fisher's large experience as a neurologist and lecturer enables him to give a most interesting and instructive course.

MEDICAL JURISPRUDENCE.

HON. WILDER L. BURNAP, of Burlington, Vt.

For many years the teaching of Medical Jurisprudence has been neglected in most of the Medical Colleges, but of late there has been a growing conviction that a knowledge of the legal side of this subject is one of the essentials of a thorough professional education; and it has properly been made compulsory in many States. The Faculty, therefore, a few years since provided for a course of lectures in this department. These lectures treat of the nature and scope of expert and scientific testimony required of physicians, and its application to, and requirements in the domain of medical science.

They embrace the subjects of Insanity and Mental capacity in both civil and criminal matters, the rights, duties, and liabilities of physicians, and many other matters of interest and importance to the profession.

DISEASES OF THE THROAT AND NOSE.

Prof. George B. Hope, of New York City, Surgeon-in-Chief to the Metropolitan Throat Hospital, will deliver a course of lectures on Diseases of the Throat and Nose. The lectures will be both clinical and didactic.
Surgical Diseases of Women.

Prof. W. Wotkyns Seymour, of Troy, N. Y., will give a course of lectures on the Surgical Diseases of Women. The lectures will be illustrated by clinical material, plates, and the manikin.

Diseases of the Skin.

Prof. Condict W. Cutler, of New York City, Physician-in-Chief to the New York Dispensary, and Instructor in Dermatology in the Post Graduate Medical School, will deliver a course of didactic and clinical lectures on Diseases of the Skin.

Sanitary Science and Hygiene.

Prof. C. F. Branch, of Newport, Vt., will deliver a course of lectures on Sanitary Science and Hygiene. The subjects discussed are the ventilation and warming of buildings, the principles of house drainage, the proper arrangement of soil and waste pipes, and the various plumbing fixtures; the sewerage of cities and towns, and the methods employed for preventing the spread of infectious and contagious diseases.

Pathology and Bacteriology.

Prof. Jo H. Linsley, of New York City, will deliver a course of lectures on these subjects during the regular session. The lectures will be abundantly illustrated by fresh pathological material and microscopical demonstrations of the more important varieties of micro-organisms.

Practical Anatomy.

H. C. Tinkham, M. D., Demonstrator of Anatomy.

As a thorough knowledge of Anatomy is only to be obtained by dissection, every student is strongly recommended by the Faculty to dissect as much as possible during his course of study. The dissecting room of the new College is large, commodious, well ventilated and lighted. Material is furnished free. The Demonstrator will be in daily attendance during the regular and preliminary terms.

The practical Anatomy fee of $10.00 includes material, and entitles each student to all the advantages of the dissecting room during the Winter and Spring Course without further charge. Every new matriculant will be required to take out the practical Anatomy ticket, either in the preliminary or regular term, and this entitles him to the privileges of the dissecting room at all times without further expense.
CLINICAL ADVANTAGES.

The Mary Fletcher Hospital, erected solely by the generosity of the lady whose honored name it bears, was opened in 1876 for the treatment of patients. Additions and improvements have been made from year to year, until now it is unrivalled in its appointments for the care of medical and surgical cases.

The Hospital consists of a large and elegant administrative building, with many rooms for private patients, and two ample pavilion wards. In a separate building, connected with the wards and administrative building by a corridor, is a large amphitheatre, capable of seating two hundred persons. There are also an anaesthetizing and a recovery room opening into the amphitheatre. Rooms for out-patients are also attached to the building. In fact, every arrangement for Clinical Instruction is found here.

In the amphitheatre Medical and Surgical Clinics will be held during the regular session, to which all the students are admitted without extra charge.

The following are members of the Medical and Surgical Board of the Hospital, who are connected with the Medical College:

Consulting Surgeon: Prof. A. M. Phelps.
Consulting Physician: Prof. A. P. Grinnell.
Attending Surgeon: Dr. John B. Wheeler.
Attending Physicians: Dr. J. C. Rutherford; Dr. H. C. Tinkham.
Ophthalmic Surgeon: Prof. J. H. Woodward.
The Faculty will make every effort to improve the Clinical teaching which has already become an important feature of the instruction in this school.

The following College Clinics will be held during the regular term. Patients presenting themselves at these Clinics for advice and treatment are examined, the peculiarities of each case are explained, the appropriate treatment is prescribed, and the requisite surgical operations are performed before the class.

A Medical Clinic will be held on Wednesday by Prof. Grinnell, during the first half of the term.

A Surgical Clinic will be held by Prof. Phelps every Saturday morning, from 9 to 12 o'clock, and every Wednesday afternoon from 2 to 4 o'clock, during the latter half of the session.

A Clinic for Diseases of the Eye and Ear, by Prof. Woodward, will be held during his course of lectures.

A Clinic for Diseases of the Skin, and Venereal Diseases, by Prof. Cutler, will be held during his course of lectures.

A Clinic for Diseases of Children will be held by Prof. Roberts.

A Clinic for Diseases of the Nervous System will be held during the course of lectures by Prof. E. D. Fisher.

A Clinic for Diseases of the Throat will be held by Prof. Hope.

Due notice of the time of holding the above Clinics will be given.
Special Practical Instruction.

Courses in practical manipulations and study are advised as supplementary to the regular methods of scholastic and clinical teaching.

Students may avail themselves of the following private courses; but it is optional with the student, which, if any, of these courses he shall follow.

URINARY ANALYSIS.
R. A. Witthaus, M. D., Professor of Chemistry.
C. Smith Boynton, M. D., Laboratory Instructor.

Instruction in Practical Urinary Analysis will be given during the preliminary and regular terms, under the supervision of the Professor of Chemistry. It is recommended that those attending the preliminary term take this course at that time.

Fee $10.00 (including cost of material.)

OBSTETRICS.

A. F. A. King, Professor of Obstetrics, &c.

A course of practical instruction on the Manikin will be given to those who desire it.

Fee $5.00.

PHYSICAL DIAGNOSIS.

A. P. Grinnell, M. D., Professor of Practice and Physical Diagnosis.

Students in this course will have an opportunity to examine cases and make diagnoses. Fifteen students only will form a class.

Fee $10.00. Ten lessons.

MICROSCOPY.

J. H. Jackson, M. D., Professor of Physiology and Microscopic Anatomy.

Instruction in the use of the microscope and in the preparation and mounting of normal and pathological specimens will be given in the physiological laboratory, during the regular term, by the professor of this branch in person, or by his assistant.

Fee $10.00 (including the cost of material, except slides and cover glasses.)
MINOR SURGERY AND BANDAGING.

J. B. Wheeler, M. D., Instructor in Surgery.

Practical instruction on this subject embraces the application of bandages, the various methods of dressing used in the treatment of wounds, fractures, and dislocations, etc.

Fee $5.00.

DISEASES OF THE THROAT AND NOSE.

Prof. George B. Hope.

A special class will be formed for practical instruction in the Examination and Treatment of Diseases of the Throat.

Fee $5.00.

OPERATIVE SURGERY.

J. B. Wheeler, M. D., Instructor in Surgery.

Students will be instructed in the various operations upon the cadaver.

Fee $15.00.

OPERATIVE SURGERY FOR PRACTITIONERS.

A course of practical instruction in surgical operations upon the cadaver will be given for the benefit of practitioners of medicine. This course is designed to give the general practitioner an opportunity to familiarize himself with the practical details of Operative Surgery. It will consist of demonstrations, by the instructor, of the various surgical operations, and of their performance upon the cadaver by the members of the class.

The course will be held in the month of December, and will last two weeks.

Fee $15.00.
Requirements for Entrance.

A candidate who has been twice rejected on final examination at this College shall not be admitted to matriculation.

All students who have matriculated in this Department of the University prior to July, 1891, will be admitted to the lectures and enrolled as students in regular standing, without preliminary examination.

Applicants who do not belong to this class, will be required to pass an Entrance Examination in Arithmetic, Grammar, Geography, Orthography, American History, English Composition and Elementary Physics, before they may be regularly enrolled as students in good standing in this Department. But applicants who may have failed in one or more branches at these examinations, may be enrolled as conditioned students; they must make up the deficiency, however, during the first year, before they can be enrolled as students in regular standing.

EXCEPTIONS:—Such entrance examination will not be required of applicants of the following classes:

1. Those who declare themselves in writing not to be candidates for the Degree in Medicine from this College.

2. Those who have received the Degree of A. B., A. M., B. S., M. S., Ph. B., or Ph. D., from a College or an University which maintains a satisfactory Academic standard.

3. Those who have successfully completed a full year's course of study in any College or University which maintains a satisfactory Academic standard.

4. Those who have passed satisfactorily the entrance examination to the Literary or Scientific Department of the University of Vermont, or to any other College or University which maintains a satisfactory Academic standard.

5. Those who have passed the entrance examination to a Medical School having requirements for entrance equivalent to those adopted by this Faculty.

6. Those who have received a "Medical Student's Certificate" from the Regents of the State of New York, or from any similarly constituted authority in other States.

7. Those who have received a Diploma or a Certificate for any ten studies from the Regents of the State of New York, or from any similarly constituted authority in other States.

8. Those who have satisfactorily completed a three years' course in a High School, Normal School, or Academy.
Time and Place of holding the Entrance Examinations.

The Entrance Examinations will be conducted at Burlington, Vermont, by a Board of Examiners appointed by the Medical Faculty.

Arrangements have been made to enable students to take, in Burlington, the examination required by the Regents of the University of New York. These examinations will be conducted by an authorized agent of the Regents of New York.

The regular examinations for entrance to the University, to which Medical students are admitted, will take place the last week in September and the last week in June. Special examinations for entrance to the Medical College only will be held the first week in November, the last week in February, and the first week in April of each year.

Requirements for Graduation.

Students who have matriculated in this College prior to July 1, 1890, will be subject to the regulations and requirements for graduation as printed in the announcement for 1890.

Three full Courses of Lectures, of at least twenty weeks each, will be absolutely required of students who do not come under the above regulation, and no period of practice will be taken as an equivalent of one Course.

No candidate shall be admitted to an examination until all fees due the College from such candidate shall have been paid.

Candidates for the Degree of Doctor of Medicine, before presenting themselves for examination, must have attended at least three full courses of lectures of twenty weeks duration each, the last at this College. The candidate must have studied medicine three years, must have attained the age of twenty-one years, and must present full certificates of the time of his study, of age, and of moral character. Each candidate is required to deposit his examination fee with the Secretary of the Faculty one month before the close of the session, and to furnish evidence of having pursued the study of Practical Anatomy under the direction of a demonstrator. He must also pass a satisfactory written or oral examination before the Medical Faculty and Board of Medical Examiners appointed by the State Medical Society. No thesis is required.

The tickets and Diplomas of Eclectic, Homoeopathic, or Botanic Colleges, or of Colleges devoted to any special system of medicine, are considered irregular, and will not be recognized under any circumstances. Certificates from preceptors who practice any particular system of medicine, or who advertise, or violate in any way the Code of Ethics adopted by the profession, will not be accepted under any circumstances, even if the preceptors be regular graduates in medicine.
Graduates of other regular colleges who desire a Degree from this University must pass a satisfactory examination in the branches of Anatomy, Physiology, Chemistry, Materia Medica, Practice of Medicine, Surgery and Obstetrics. No thesis is required.

No credit in time or in lectures shall be given any student, by virtue of his Degree in Pharmacy, Dentistry, or Veterinary Surgery.

Degrees in absentia are not conferred by this University under any circumstances whatever.

SPECIAL EXAMINATIONS
IN THE ELEMENTARY DEPARTMENTS.

Students who have attended two full courses of lectures in all departments taught in this College, may be examined upon Anatomy, Physiology, Chemistry, and Materia Medica, at the end of the second course, and if they be successful in these examinations will be examined at the end of the third course upon Practice of Medicine, Surgery and Obstetrics only. Candidates for the primary examinations will be required to pay three-fifths of the examination fee. The primary examinations are held at the close of the regular session only. The certificate and the remainder of the examination fee are to be handed to the Secretary at the regular time before the examination. Certificates of having passed in any branch or branches in other Colleges are not accepted by this College.

Faculty Prizes.

The Faculty have established two Prizes for general proficiency in examination—a first Prize of Fifty Dollars, and a Second Prize of Twenty-Five Dollars. These prizes will be awarded as follows:

The ten students who pass the best examinations for their degree will be allowed to compete in a written examination for the prizes; of this number, the five who rank highest shall be called Honor Men, and will each receive a Special Diploma of Honor, and of these last, those who are deemed worthy shall receive respectively the first and second prizes.

The first prize was awarded to M. L. Chandler; the second prize to J. H. Linehan.
The Regular Course of Lectures,

The Session of 1892 will commence on Thursday, February 25th, and will continue twenty weeks. This Course will consist of five or six lectures daily, in the various departments of Medicine and Surgery.

Fees for the Regular Session.

All fees are payable in advance.

Students who have attended two full courses of lectures in some other regular school or schools are admitted on paying the matriculation fee and $50.

Students who have already attended one full course in this College and one full course in some other regular Medical School, are admitted on paying the matriculation fee and $50.

Graduates of other regular American Medical Schools are admitted on payment of the matriculation fee and $25.

Foreign applicants for the Medical Degree of this University are admitted on payment of a fee of eight guineas.

Graduates of this school are admitted without fee.

Theological students are admitted on payment of the matriculation fee only, unless intending to graduate in medicine, in which case they will be required to conform to the above conditions.

For further particulars, address the Secretary,

J. H. Woodward,
Burlington, Vt.
Preliminary Term to Session of 1892.

RECITATIONS AND LECTURES.

A Preliminary Course of Lectures and Recitations on Anatomy, Physiology, Chemistry, Materia Medica, Surgery, Obstetrics, and the Principles and Practice of Medicine, will be given, beginning October 30th, 1891, and continue until the following March. Opportunity will be offered for private dissection. Material will be furnished at cost. Daily demonstrations will be made by the Instructor of Anatomy. The fee for the above Course is $35.

Attendance upon this term is optional with the student, and it is not reckoned as a Course of Lectures. Students, however, are earnestly advised to attend, as they are thus better prepared to comprehend the lectures in the Regular Course.

CORPS OF INSTRUCTORS.

Prof. A. P. GRINNELL, Theory and Practice.
Dr. JOHN B. WHEELER, Surgery.
Dr. HENRY C. TINKHAM, Anatomy.
Dr. J. C. RUTHERFORD, Obstetrics and Diseases of Women.
Dr. B. J. ANDREWS, Physiology and Microscopic Anatomy.
Dr. L. W. FLANDERS, Materia Medica and Therapeutics.
Dr. C. S. BOYNTON, Chemistry.

Letters requesting information should be directed to

J. H. WOODWARD, Burlington, Vt.,
Secretary of the Faculty.

Or to Dr. H. C. TINKHAM, Burlington, Vt.,
Secretary of the Faculty of the Preliminary Term.
TEXT BOOKS
AND WORKS OF REFERENCE.

The work first named on each subject is preferred.

On Physiology and Histology—Kirke’s Physiology, Foster, Flint, Power, Klein’s Histology.
On Theory and Practice—Loomis, Flint, Roberts, Strumpell, Reynolds, Pepper, Vierordt’s Medical Diagnosis, Delafield’s Post Mortem Examinations.
On Surgery—Bryant, Druitt (Eng. Ed.,) Gross, Paget’s Surgical Pathology, Billroth’s Surgical Pathology, Heath’s Minor Surgery and Bandaging, Ranney’s Surgical Diagnosis.
On Diseases of the Urinary Organs—Bumstead & Taylor, Gouley, Van Buren & Keyes.
On Diseases of the Eye and Ear—Nettleship on the Eye, Pomeroy on the Ear.
On Diseases of Children—Eustace Smith, Henock, Meigs and Pepper.
On Diseases of the Skin—Piffard, Liveing, Fox, Taylor.
On Diseases of the Nervous System—Hammond.
For Reference—Gould’s Medical Dictionary, Dunglison’s Medical Dictionary.

BOARD.

Board may be obtained for from $3.50 to $5.00 per week. Good accommodations furnished students who wish to board themselves. Many adopt this method at a great reduction in expense. Students who intend to board themselves will find such bedding and culinary articles as they may require furnished with the rooms.

After registering, every student is furnished with a certificate entitling him to half fare on railroad and steamboat lines running into Burlington.

TO THE VERMONT MEDICAL SOCIETY.

MR. PRESIDENT AND GENTLEMEN:

As one of your delegates appointed to attend the examination of candidates for the degree of Doctor in Medicine at the Medical Department of the University of Vermont, I beg leave to report as follows:

That I attended these examinations alone, my fellow delegate, Dr. Styles, not being present.

That the examinations were conducted in the most thorough and satisfactory manner. Anatomy, Obstetrics, Theory and Practice were oral; Chemistry, Materia Medica, Surgery and Physiology were written: Anatomy being principally upon the cadaver, thereby giving every student the chance to show his knowledge to the best advantage.

There were eighty-four men who came up for examination, for their degree; of these, fifteen failed, and sixty passed. Ten came up for examination upon Primary Branches, most of whom passed satisfactorily.

That those who succeeded were men well up to the standard in the medical profession, and will grace the fraternity in whatever field they may locate.

The one thing lacking is some Vermonter, or other friend, to immortalize his name and the Medical College with a legacy, thus enabling the Faculty to accomplish the much desired scheme of Grading the Course, thereby bringing the School into the front rank with large City schools.

Respectfully submitted,

C. F. CAMP,
Delegate.

Medical Alumni Association.

Graduates of the Medical Department are earnestly requested to forward their names, residence, post-office address, and other items of personal interest to the undersigned.

The payment of one dollar entitles you to membership, and you will be furnished with a copy of the Annual and General Catalogue.

Dr. C. P. THAYER, Burlington, Vt.
UNIVERSITY OF VERMONT.

BOARD OF TRUSTEES.

MATTHEW HENRY BUCKHAM, D.D.,
President.

His Excellency CARROLL S. PAGE,
Governor of the State.

On the part of the University of Vermont:

Hon. WORTHINGTON CURTIS SMITH, St. Albans.
Hon. HOMER NASH HIBBARD, LL. D., Chicago, Ill.
Hon. GEORGE GRENVILLE BENEDICT, A. M., Burlington, Vt.
Hon. WILLIAM GOODHUE SHAW, A. M., Burlington, Vt.
Hon. HORACE HENRY POWERS, A. M., Morrisville.
Hon. TORREY ENGLESBY WALES, A. B., Burlington.
Hon. GEORGE GRENVILLE BENEDICT, A. M., Burlington.
Hon. WILLIAM GOODHUE SHAW, A. M., Burlington.
Hon. EDWARD JOHN PHELPS, LL. D., Burlington.

On the part of the State Agricultural College:

Hon. JUSTIN SMITH MORRILL, LL. D., Strafford.
Gardiner S. Fassett, Enosburgh.
Cassius Peck, Brookfield.
Hon. Crosby Miller, Pomfret.
Hon. Ebenezer Jalls Ormsbee, A. M., Brandon.
W. J. Robinson, Barton.
Hon. cyrus jennings, Hubbardton.
T. M. Graves, Underhill.

GEORGE GRENVILLE BENEDICT, A. M., Secretary.
HENRY ORSON WHEELER, A. B., Treasurer, 18½ College Street.

Executive Committee:
MATTHEW HENRY BUCKHAM,
GEORGE GRENVILLE BENEDICT,
WILLIAM GOODHUE SHAW,
HORACE HENRY POWERS.

Finance Committee:
JUSTIN SMITH MORRILL,
WILLIAM GOODHUE SHAW,
TORREY ENGLESBY WALES.
Instruction is given in the UNIVERSITY in—

I. The Course of Liberal Arts, which is the usual Collegiate Course in the Languages, ancient and modern, Mathematics, Physical Science, Mental, Moral and Political Philosophy, Rhetoric, Literature, and History; leading to the degrees of Bachelor of Arts and Bachelor of Philosophy.

II. The Courses required (1.) by the Morrill Act of 1862, which provides that instruction be given not only in "classical and other scientific studies," but especially in "branches of learning relating to Agriculture and the Mechanic Arts"; and (2.) by the Endowment Act of 1890, which provides for instruction in "agriculture, the mechanic arts, the English language, and the various branches of mathematical, physical, natural and economical sciences, with special reference to their application in the industries of life." These courses are

1. A Course in Civil and Sanitary Engineering.
3. A Course in Agriculture.
4. A Course in Mechanic Arts.
5. A Course in Electrical Engineering.

Candidates may be admitted without examination if they bring certificates from reputable Preparatory Schools whose courses of study fully meet the requirements for admission, but students so admitted are on probation during the first year.

A Course preparatory to the study of Medicine, embracing from two to three years, is offered, the particulars of which will be furnished on application.

All the courses in the Academic and Scientific Departments are open to young women upon the same conditions as to young men. The young women are required to room and board in private families approved by the Faculty.

Scholarships, cancelling tuition, have been established for the benefit of young men of limited means, in the Academic Department.

The University enjoys unusual facilities for securing employment for students in the Engineering Department, both during the course and after its completion.

The Chemical Laboratory affords the ampest facilities for analytical work. Medical students, or persons who intend to engage in Pharmacy, may take a special Laboratory Course.

Furnished dormitories are rented to Academical students at from $18 to $25 per annum, including care. Table board may be had for $2.50 to $3.00 per week.

For further information or catalogue, address

M. H. BUCKHAM, President.
