A Summer Migration

How we moved our research guides to a new website.

Hitting the Trail

The Oregon Trail (Apple II, 1985)

Time to migrate!
Goals & challenges

Why did we need to move on from v1?

- fixes, but no significant development
- sub-optimal legibility: dense content, small type, chunky boxes
- diminishing support

What is the appeal of v2?

1. enhanced features: mobile-first design, on-page editing, flexible options for presenting content
2. customized design:
3. active development

v2 examples
**Goals**

- complete the upgrade in time for summer instruction
- minimize disruption of service
- support liaisons: workshops, "ambassadors"

**Challenges**

- time!
- pre-migration: weeding and prepping
- post-migration: cleaning up
- organizational structure: integrating Bailey/Howe and Dana guides
- look and feel

---

**Life in v2**
We made it!
